

Reduce Benefit Overpayments and Preserve Program Integrity

Strengthen Agency Program Integrity with Incarceration Intelligence:

- Child Support
- Medicaid
- Supplemental Nutrition Assistance Program (SNAP)
- Temporary Assistance for Needy Families (TANF)
- Unemployment Insurance

2,000+
JAILS AND DOCS
Direct interfaces to over 2,000 jails and DOCs

>80%
INCARCERATIONS
Over 80% of all incarcerations in the U.S.

140M+
BOOKING RECORDS
140M+ historical records
1M+ records/month

Challenges of Determining Eligibility

State government agencies face significant challenges when determining eligibility and distributing benefits to individuals moving in and out of incarceration.

Agencies spend hours, days, even weeks, attempting to locate and monitor individuals who are in various stages of the incarceration lifecycle. An agency may perform some of the following tasks to locate a single beneficiary: calls to multiple jails and DOC facilities, searching online jail databases, and scanning shared in-custody lists (when available).

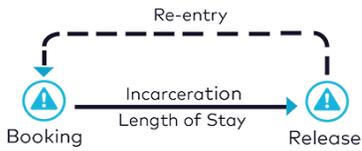

This lack of timely and comprehensive incarceration data often results in negative consequences, such as improper payments, disruption in services, and increased program expenses.

The Appriss Incarceration Intelligence Solution

Appriss Safety is a leading data integration company that operates the nation's most comprehensive and current incarceration data network, with direct jail management system interfaces to over 2,000 jails and prison facilities. Collaborating with entitlement program agencies across the country, we have identified a critical need for access to real-time incarceration data to prevent improper payments while Medicaid beneficiaries, unemployment insurance recipients, and SNAP/TANF recipients are in the various stages of incarceration.

Appriss' Incarceration Intelligence solution gives agencies access to accurate and timely data through a single source. Automatically monitor specific populations, such as Medicaid beneficiaries, unemployment insurance claimants, hard-to-locate non-custodial parents, SNAP/TANF beneficiaries, state licensees, and probationers/parolees.

Continuous Monitoring of Person of Interest

Automated alerts notify you in real-time of key changes to incarceration status

Receive alerts when a monitored recipient is:

Booked into custody

Released from custody

Incarcerated for a certain "length of stay"

About Appriss Safety

Appriss Safety is the developer of the Appriss Insights Platform, the nation's most comprehensive source of incarceration, justice, and risk intelligence data. We are a team of technology and data science experts who provide insights and analytic solutions that support informed decisions for early response to people-driven fraud and risk.

Benefits of Appriss' Incarceration Intelligence Solution

As the developer of the nation's most comprehensive incarceration database, and as a tech industry leader with expertise in data integration, Appriss offers entitlement program agencies access to real-time, nation-wide incarceration data and a team of experts to implement and support it.

With our breadth of data and technical expertise, government agencies can address many of the challenges that coincide with incarcerated beneficiaries through real-time alerts. Access to Appriss data eases agencies' administrative burden, enabling the establishment of internal process efficiencies, saving both time and resources.

Why Appriss

Through access to Appriss' real-time incarceration data, coupled with our unmatched industry expertise, we possess the knowledge and skill set required to successfully partner with entitlement program agencies to resolve the challenges you face regarding incarcerated beneficiaries. The Appriss Incarceration Intelligence solution has the power to vastly improve agency efficiencies and save countless dollars.

Appriss Incarceration Intelligence Success Stories

Child Support Enforcement:

In just 90 days, the Kentucky Division of Child Support was able to locate 40% of its "watched" non-custodial parents.

Medicaid:

The California Department of Health Care Services (CA DHCS) determined that 1,800 beneficiaries were actually ineligible to receive benefits, with projected cost savings of \$7.4 million over 24 months.

Unemployment Insurance:

The Illinois Department of Employment Security saved \$8.6 million in improper payments, detected \$1.8 million in overpayments, and successfully recovered \$659,000.
